Pediatric-Transforming Clinical Practice Initiative (P-TCPI)

Why Join?
- Prepare for value-based reimbursement and maximize payment for your services.
- Improve your staff and patient experience.
- Learn from and share with your peers.
- Earn free CME and support for MOC/QI certification.
- Support for behavioral health integration and access.
- Receive regular reports on key clinical and utilization metrics for your Molina patients.
- Payment for care coordination in your clinic if you participate in Health Home Care Coordination Organization training.
- It’s free!

Who are we?
P-TCPI is a Washington based team of experts from the Washington Chapter of the American Academy of Pediatrics, Washington State Department of Health, Molina Healthcare, and the Centers for Medicare & Medicaid Services, and we are ready to support you on the path to transformation. We’re part of the largest national grant ever awarded for clinical improvement which has a goal of engaging over 140,000 providers nationwide.

What is our focus?
There are four Practice Transformation Networks (PTNs) working in Washington state. Our PTN is the only one with a child focus, serving family practice and pediatric clinics working with children ages 0 to 20.

What are the expected outcomes?
- Improved asthma care, well-child check-ups, and immunizations.
- Decrease in avoidable emergency room visits and hospital admissions.
- Improved access to pediatric behavioral health care.
- Clinical business operations readied to take advantage of coming value-based payment reform.

Participant Expectations
- Senior management sponsorship
- Establish a Quality Improvement Team including a provider champion and day-to-day leader.
- Dedicated staff time to work on practice improvement throughout the project period.
- Monthly reporting on three clinical and one process improvement measures as determined by your clinic’s practice assessment and ability to report.
- Molina Network provider preferred but not required.
- Participation in monthly events, which may include webinars, community workshops and coaching contacts.
- Quarterly completion of a Practice Assessment Tool and brief insight report.
- Support for this initiative is through September 2019. The length of your commitment is determined by your clinic’s progress.
How does it work?
The first three months after your practice enrolls:

Practice facilitator meets with you to sign commitment letter and answer questions
Clinic completes Practice Assessment Tool (PAT) used to guide your improvement work
Your facilitator meets with your team to review PAT, develop an aim statement and select your measures
Start of learning-in-action activities using the Plan-Do-Study-Act model for improvement

After the first three months you can expect:
- Monthly team meeting with practice transformation facilitator to review progress, challenges, and plan next tests of change.
- Quarterly data reports on your Molina patients for clinical indicators such as asthma management, well-child checks, and immunizations, as well as ED utilization.
- Access to a regional clinician champion with transformation experience.
- Access to a peer learning community.
- State and national webinars dedicated to aspects of healthcare delivery changes.
- In-person regional training by expert faculty on clinical care, quality improvement, care coordination, team-based care and other topics.
- Quarterly practice assessment to guide progress and compare with other practices.
- Information on Accountable Communities of Health regional practice improvement and community-clinical linkage activities.
